

PRESS RELEASE
OCTOBER 09, 2003

LUKOIL TRIPLES NET PROFIT DESPITE GREATER TAX BURDEN

LUKOIL today disclosed its consolidated financial statements for the first three and six months of 2003 prepared in accordance with US Generally Accepted Accounting Principles (US GAAP).

The Company showed significant growth of net profit in the second quarter of 2003. Net profit almost tripled year-on-year from USD 840 million to USD 2.36 billion. The Company's earnings before interest, tax, depreciation and amortization in the period under review were USD 3.18 billion as against USD 1.66 billion in the same period last year.

LUKOIL continued successful efforts to boost efficiency and increase value in the second half of 2003. One example is the sale of LUKOIL's 10% stake in the Azeri-Chirag-Guneshly project in the second quarter of the year, which brought USD 1.13 billion in net profit. At the same time, the Company is striving to find efficient substitutes for the divested assets. Geological exploration work added 1.21 billion barrels of oil equivalent to LUKOIL's proved reserves in 2002, estimated in accordance with international standards. Finding cost per one barrel of oil equivalent was USD 0.25.

Export operations rose to 71% of total sales in the first half of 2003 from 64% in the same period last year. The Company cut its crude sales on the domestic market by 12.7 million barrels or 34.1% as against the same period last year.

The Company's production in the second quarter of this year grew by 3.5%, which is double the growth rate for the same period last year.

The Company continued to optimize its exploration and production activities, closing down 594 less efficient wells since January 1, 2003. The average well rate in the first six months of this year rose to 9.4 tons per day from 9.0 tons per day in 2002. Oil production costs in the same six-month period were USD 2.59 per barrel based on inflation of 8% and a 13% rise in the ruble-to-dollar exchange rate.

The Company's capital expenditure in the period under review was USD 1.36 billion as compared with USD 798 million in the same period last year. LUKOIL thus remains a major investor in the fuel-and-energy sector. The Company is expanding its own export infrastructure in order to reduce transportation costs. The Varanday Terminal will increase its annual capacity from five million to nine million tons by the end of this year, and in early October LUKOIL started up phase-1 of an export terminal with annual capacity of up to one million tons at Ilyinka in Astrakhan Region.

The Company paid nearly USD 3 billion in taxes in the first half of 2003 (USD 1.8 billion in the same period last year).
