LUKOIL PUBLISHES CONSOLIDATED US GAAP FINANCIAL ACCOUNTS
FOR NINE MONTHS OF 2004

LUKOIL today publishes consolidated US GAAP financial accounts for the third quarter and nine months of 2004.

LUKOIL net profit in 9 months of 2004 was \$3,095 mln, which is \$1,292 mln higher than in the same period of 2003 (excluding cumulative effect of change in accounting policy and effect of sale of the Company's stake in the Azeri-Chirag-Gyuneshli project). Tax payment to the Russian budget (excluding profit taxes) was \$2.46 bln, which is 40% more than in the same period of 2003.

Net profit rose mainly due to favorable market conditions and improvement in expense control. Net profit growth was restrained by the rising tax burden, strengthening ruble and continuing increase in transportation expenses.

LUKOIL sales revenue in 9 months of 2004 was \$24,217 mln, which is 50.1% higher than in the same period of 2003.

Average crude production expenses fell from \$2.60 to \$2.54 per barrel (by 2.4%), despite strengthening of the ruble in real terms (8.9% during 9 months of 2004), thanks to increase in average flow rate per well from 9.58 to 10.65 tons per day (by 11.2%), and thanks to restructuring of oil production assets.

Total capital expenditures by LUKOIL in 9 months of 2004 were \$2,242 mln, which is 7.4% higher than in the same period of 2003 (\$2,087 mln).

In line with the long-term strategy the Company increased average daily production (including LUKOIL's share in affiliates) by 8.2% and total production was 474.5 mln bbls (64.1 mln tons) in 9 months of 2004.
