

PRESS RELEASE
DECEMBER 22, 2000

LUKOIL NET INCOME UNDER US GAAP AMOUNTED TO 1452 MILLION US
DOLLARS

OA O LUKOIL prepared consolidated financial statements under US GAAP for the first half 2000. Interim statements included accounts of 525 subsidiaries and affiliated companies. The financial statements show a significant improvement in all areas of financial and economic performance of the Group. Net income increased to USD1.5bn (USD2 per common share). Sales increased 116% and amounted to USD6.2bn. Assets of the Group increased 45% and reached USD 14.6bn. Stockholders' equity exceeded USD8.6bn. Most operating efficiency figures indicate a significant improvement in liquidity, financial stability, and creditability of LUKOIL. Positive financial results were recorded in all core businesses and in all regions of the Company's operations. Most of the Company's overseas capital-intensive projects reached a breakeven level and contributed considerably to increased financial results.

Better financial results were attributable to improved conditions at world energy markets, increased demand and strong oil and petroleum product prices. A significant improvement of economic situation in Russia and sustainable macroeconomic growth in 1999-2000 contributed to growth of revenues from core businesses.

All businesses saw sustainable growth of operating performance. Overall oil production by all subsidiaries and affiliates of the Group increased 2% and reached 38.5 million tons. Gas production grew 6% to 2.5 billion m3. Throughput at Russian and foreign refineries of LUKOIL amounted to 14.4 million tons.

Capital expenditures and investments of the Group amounted to USD1,107 m compared to USD615 m in the first half 1999. Drilling increased 68% (837,000 m), 259 wells were brought to operation. As a result of G&G 4 new fields and 5 deposits of hydrocarbons were discovered.

Publication of the financial statements marked LUKOIL transition to international standards of financial reporting and enhanced corporate transparency and investment attractiveness.
