LUKOIL REPORTS PRELIMINARY OPERATING DATA FOR THE FOURTH
QUARTER AND FULL-YEAR 2017

The LUKOIL Group's hydrocarbon production excluding West Qurna-2 project in the fourth quarter of 2017 increased by 2.9% quarter-on-quarter to 2,284 thousand boe per day. The increase was driven by the development of gas projects.

In 2017 production increased by 2.4% year-on-year to 2,234 thousand boe per day.

In 2017 oil production excluding West Qurna-2 project was 85.6 million tonnes, including 21.5 million tonnes produced in the fourth quarter of 2017. Starting January 2017 LUKOIL Group's oil production volumes and dynamics are mainly defined by the external limitations of Russian companies' production volumes.

In the fourth quarter of 2017 oil production at V. Filanovsky field increased 21.2% quarter-on-quarter and reached 4.6 million tonnes for the full year, outperforming the planned annual level by 170 thousand tonnes. Production growth was driven by the launch of three production and two injection wells during the year. Production drilling at the second stage of the field development started in December, 2017.

Active development of high viscosity oil projects continued in Timan-Pechora. Production at Yaregskoe field and Permian reservoir of Usinskoe field increased by 11.5% and 9.3% quarter-on-quarter respectively.

Successful development of Pyakyakhinskoe field led to an increase in crude oil and gas condensate production to 1.5 million tonnes for 2017.
