

PRESS RELEASE
JUNE 28, 2006

LUKOIL NET INCOME ROSE BY 43% IN THE FIRST QUARTER OF 2006

LUKOIL publishes today consolidated US GAAP financial accounts for the first quarter of 2006.

LUKOIL net income for the first quarter of 2006 was \$1,689 million, which is an increase of 43.1% y-o-y. EBITDA was \$2,806 million, which is 43.2% higher y-o-y. Revenue from sales in the first quarter of 2006 was \$14,943 million, which is 41.5% higher y-o-y.

The increase in net income resulted from favorable market conditions, refining margins growth, hydrocarbon production and refinery throughputs increase as well as from costs control. At the same time the growth of net income was restrained by strengthening of the ruble against the dollar and growth of tax burden.

Tax expenses by the Company in the first quarter of 2006 totalled \$5.1 billion, up 45.3% y-o-y.

Operating expenses in the first quarter of 2006 rose by 15.1% y-o-y.

Real appreciation of the ruble against the dollar is a significant factor, affecting our operating expenses in Russia. For the twelve-month period ended March 31, 2006 the real ruble appreciation was 10.9%.

Average hydrocarbon lifting costs rose from \$2.52 up to \$2.82 per boe, or by 11.9% y-o-y. Taking into account the strengthening of the ruble against the dollar in real terms, average lifting costs remained at the same level as in the first quarter of 2005.

Capital expenditures including non-cash transactions were \$1,163 million, which is \$225 million higher y-o-y.

In the first quarter of 2006 LUKOIL hydrocarbon production grew by 10.5% and reached 2,122 th. boe per day.

In the first quarter of 2006 LUKOIL increased its average daily production of crude oil by 4.6% to 169.4 million barrels, or 23.0 million tons (including share in affiliates). Average flow rate per well increased from 11.00 tons per day in the first quarter of 2005 to 11.15 tons per day in the first quarter of 2006.

Gas production (including share in affiliates) in the first quarter of 2006 was 3,665 million cubic meters, which is 97.8% higher y-o-y. This growth is due to the increase of natural gas production at the Nakhodkinskoye field. The field produced 1,823 million cubic meters of natural gas in the first quarter of 2006.

Production of petroleum products at LUKOIL refineries increased by 12.4% y-o-y and totaled 11,279 thousand tons.

LUKOIL sold 30.3 million tons of crude oil and petroleum products in the first quarter of 2006, which is 8.8% higher y-o-y. The share of international sales (including near-abroad countries) in total volume of sales was 81.8% compared with 81.2% in the first quarter of 2005. Retail sales of petroleum products increased by 363,000 tons or by 17.1% y-o-y during the first three months of 2006. Revenues from retail sales grew by \$643 million (46.2%).
