## LUKOIL APPROVES 2014 RESEARCH AND TECHNOLOGY PROGRAM

The OAO LUKOIL Management Committee approved LUKOIL Group's 2014 Annual Research and Technology Program.

It includes approximately 1,000 topics divided into five categories:

- research, development and technology work;
- research-and-technology work in the area of oil- and gas-field development and operation;
- research-and-technology work in geologic exploration;
- research-and-technology work in the area of raw-material base appraisal;
- functional research-and-technology work and services.

The total financing for the Program comes to RUB 6 billion. Most of the funds will be allocated to research-and-technology work in the Geologic Exploration&Production Business Segment.
