LUKOIL STARTS PRODUCTION OF TRANSMISSION FLUIDS FOR ELECTRIC VEHICLES

LUKOIL became the national pioneer in production of specialized transmission fluids for electrically powered automobiles.

LUKOIL E-FLUID 301 is already available at authorized service stations. The product ensures stable functioning of the electric cars that feature direct contact of the electric motor and transmission fuel. This type of vehicles is in great demand now.

LUKOIL E-FLUID will come in retail soon. The fluid will be used for the first filling by electric cars manufacturers in Russia.

LUKOIL E-FLUID lubricants fully meet the demands of leading carmakers and requirements of international standards. The launch of the manufacturing of these fluids is an evidence of LUKOIL's scientific and technical potential and the Company's ability to create advanced and globally sought-after products.

Information about company:
LUKOIL is one of the largest oil & gas vertical integrated companies in the world accounting for over 2% of crude production and circa 1% of proved hydrocarbon reserves globally. LUKOIL enjoys a full production cycle to control the entire value chain from upstream to downstream. LUKOIL employs over 100 thousand people who join their efforts and talents to secure the Company's market leadership.
